

Seeka®

Powerful biological control from ICL

**Fungus Gnat
Larvae**

**Vine Weevil
Larvae**

Seeka® is a range of beneficial nematodes, powered by BASF technology, which helps ornamental growers reduce the risk of damage from pests which feed on their plants.

The ICL Difference

When you buy ICL products, you also receive quality advice and support from ICL's technical experts both in person and online. We aim to provide customers with the 'best in class' advice and support to help maximise plant quality throughout the growing season.

Features and Benefits

- Two distinct products for use on specific pests at the larval stage
- **Exclusive to ICL customers** - Access to nationwide temperature data to increase return on investment
- ICL support from a network of technical area managers
- Reliable performance
- Easy application methods
- Persistent in the growing media for medium term control
- Safe to crops, users and the environment
- Suitable for IPM practices
- Suitable for organic growing

**Fast and effective
natural control**

**The most robust and
efficacious nematode
control in the market**

**Exclusive to ICL
Access to nationwide
temperature data**

**Increase nematode
performance with ICL's
exclusive penetrant
Transporter**
